LANDSCAPING REPORT

Holy Child Central Colleges, Inc. (HCCCI) maintains landscaped areas along its front walkway and beside the campus building. The photographs show snake-plant-type foliage, yucca-type ornamentals, ferns, and other potted plants. Snake plant (Dracaena trifasciata) requires little water and tolerates drought [1], making it a candidate water-saving species. Grounds personnel should complete the confirmation on page 2.

Figure 1. Front landscaped strip beside the tiled walkway and parking area.

Figure 2. Front strip showing the central snake plant, yucca at left, and bird's-nest fern near the shrub at right.

Figure 3. Front landscaped strip beside the access ramp. The snake plant is left of centre and the yucca-type plant is right of centre.

Plant labels and grounds confirmation

Figure 4. Fiddle-leaf fig in a rectangular planter along the covered exterior walkway.

Figure 5. Side garden beside the building, with cylindrical snake-plant-type foliage and mixed broad-leaved ornamentals.

Plant labels	Location
Snake plant - likely Dracaena trifasciata	Large central clay pot in Figures 1 to 3.
Yucca - Yucca sp.	Tall woody ornamental in Figures 1 to 3.
Bird's-nest fern - likely Asplenium sp.	Small clay pot near the variegated shrub, Figures 1 and 2.
Fiddle-leaf fig - Ficus lyrata	Rectangular black planter in Figure 4.
Cylindrical snake plant - Dracaena sp.	Raised black pot near the parking edge in Figure 5.
Dumb cane - Dieffenbachia sp.	Yellow-green broad-leaved foliage in Figure 5.
